

Construction & Engineering automation to enable growth with **SAP Business ByDesign**[®]

Before: Challenges and Opportunities

- Galfar Engineering's previous systems were time consuming, and clumsy at handling data.
- The payment and accounting systems relied upon other ERP accounting system, which required multiple document verification ,excessive admin and caused delays.
- A new, fully flexible platform was required that would automate processes , Integration within multiple department ,transparency in process, Access Control and provide management with real-time data.

Why SAP Business ByDesign and Inflexion

- SAP Business ByDesign is extremely adaptable software that removes manual data inputting and makes migration of data easy.
- Inflexion was a local SAP partner who offered great communication and were accessible after hours and even on holidays.
- Due to available of Subject matter expert , the issue raised were able to be resolved quickly.

After: Value-Driven Results

- Since implementation, stock levels can be accessed instantly, saving time and money.
- All vendors and suppliers are paid on time thanks to automatic reminders.
- Reports can be generated quickly, helping to keep track of stock and flow.
- Auditing is faster, more transparent and accessible.
- Online stock oversight enables the team to plan ahead and spot any potential problems or delays.

“With SAP Business ByDesign, **all data is now live, instantly accessible and actionable**. Transparent , Saving time and money.”
