

Securing logistics in the Cloud with SAP Business ByDesign®

Before: Challenges and Opportunities

- Emirates Aviation Supply Centre's previous system could not process large amounts of data in a quick and accurate manner.
- Their system required constant updates and maintenance, and they did not have a dedicated IT team.
- New software was required that allowed viewing profit/revenue as a separate segment and could fix reporting issues.

Why SAP Business ByDesign and Inflexion

- SAP Business ByDesign was cost effective and a cloud-based solution, fulfilling the need of a back-up server.
- SAP Business ByDesign's mobility solution provides on the go access.
- Inflexion provided excellent support throughout the process and executed a smooth implementation.

After: Value-Driven Results

- Emirates Aviation Supply Centre is now able to monitor employee performance, quotations and orders in real time, increasing visibility across multiple business areas.
- Internal processes have now been streamlined, thanks to one-click reports and analysis.
- Emirates Aviation Supply Centre's management is extremely pleased with the cloud-based nature of the solution, which keeps costs and complexity low.
- SAP Business ByDesign provided Emirates Aviation Supply Centre with the critical component to drive proposed expansion plans.

“SAP Business ByDesign has greatly improved our **chances of future expansion.**”
