

Fresh processes on one unified system with **SAP Business ByDesign®**

Before: Challenges and Opportunities

- Falcon Trading’s previous system could not manage inventory and invoicing, resulting in inefficiencies.
- Inventory control was completed manually, which generated time-consuming paperwork.
- A new ERP solution was required that could unite stock management and invoicing capabilities together on one system.

Why SAP Business ByDesign and Inflexion

- SAP Business ByDesign is a platform that can adapt and grow with Falcon Trading’s growth goals of taking the business nationwide.
- Inflexion quickly overcame any legacy issues, and any that arose during implementation.
- The Inflexion team continue to provide support with the aim of bringing real-time data to Falcon Trading.

After: Value-Driven Results

- Since implementation, invoicing can be dealt with quicker with less inaccuracies.
- Inventory is now managed via SAP Business ByDesign.
- Stock take can be checked at the end of each day, once all transactions have been completed.
- Falcon Trading now has a robust platform they can build upon, with the aim of capturing and accessing real-time data, on the go.

“SAP Business ByDesign and Inflexion are my partners in **turning our long term vision of real-time data being available on the Cloud into a reality.**”
