

SAP Business ByDesign® modernizes businesses for maximum efficiency

Before: Challenges and Opportunities

- Extreme Marine previously maintained paper records that had to be consolidated manually, which was a time-consuming process and caused inaccuracies.
- The previous ERP system did not support an online store or track customer history.
- A new ERP system was required to eliminate the use of paper ledgers and support Extreme Marine's online business model.

Why SAP Business ByDesign and Inflexion

- SAP Business ByDesign is a cloud-based ERP that empowers users by delivering real time access to dashboards and essential data, improving decision making.
- SAP Business ByDesign provides a digitalized end-to-end ERP solution, which translates to paper ledger elimination, and in turn, a more digital focus.
- Inflexion showed good understanding of Extreme Marine's industry and has offered consistent highly professional support throughout implementation.

After: Value-Driven Results

- Since implementation, business control has greatly improved thanks to a modern user interface backed by powerful analytics.
- Management can now make better business decisions thanks to real-time reports focusing on costs, revenue, tax management and VAT.
- SAP Business ByDesign has provided a significant visibility boost across all departments since implementation.

“SAP Business ByDesign is **extremely user friendly** compared to other ERP solutions available.”

Mr. Debasis Mishra - Head of Finance, Extreme Marine Equipment and Services

25% time savings

since implementation of SAP Business ByDesign
