SAP Business One® – educating great minds with online opportunities

Before: Challenges and Opportunities
- All Prints' previous system was outdated, and all records were manually tracked and recorded on spreadsheets.
- Multiple systems were being used to track warehouse inventory, which was time consuming and caused inaccuracies.
- New ERP software was required that was flexible and could integrate All Prints' sales and finance modules.

Why SAP Business One and Inflexion
- SAP Business One works seamlessly with Microsoft Excel, where All Prints' primary work is conducted.
- SAP Business One is capable of tracking inquiries from over a thousand clients simultaneously, an important requirement for All Prints.
- Inflexion provided multiple customizations for SAP Business One and strong support through implementation.

After: Value-Driven Results
- All departments have now been integrated on SAP Business One, establishing clear process controls and end-to-end material tracking capabilities.
- Access to real-time data has simplified reporting and provided flexibility in the generation of reports.
- All processes are now transparent.
- Since implementation, processes have been streamlined thanks to a clearly defined approval cycle.
- Online shopping integration, and the resulting growth, has encouraged expansion plans for All Prints.

"SAP Business One is a **fast, reliable and trustworthy** ERP system."
Mr.Bassel Zarwi – Head of IT, All Prints Distributors and Publishers

35% increase in productivity

since implementation of SAP Business One
