

Investing in enhanced economic and business growth with SAP Business ByDesign®

“Today, Inflexion and SAP are major stakeholders of the company, they hold all our business and all our numbers, **we cannot operate without them today.**”

Hussein Yateem – Finance Manager, QualiGroup Holding

Effective workflow processes

since deploying SAP Business ByDesign company-wide

Featured Partner

Before: Challenges and Opportunities

- Previously, consolidation was a major issue.
- All departments and companies were working from different systems, which made sharing data problematic.
- New software was required that could introduce streamlined processes across all departments and support new projects from the start.

Why SAP Business ByDesign and Inflexion

- SAP Business ByDesign is a cloud-based platform that can be implemented across offices in different cities.
- SAP Business ByDesign provided all the functionalities that QualiGroup was looking for.
- Inflexion’s teams demonstrated they could deliver SAP successfully, and continue to support when problems arise.

After: Value-Driven Results

- QualiGroup now has workflow management in place, enabling all departments to work seamlessly together.
- Real-time data speeds up approval processes.
- All companies across all countries can interact with one another.
- The level of data on offer has matured, so management can start to explore dashboards and reporting capabilities.
